**HARMEL PEONY COMPANY**

ESTABLISHED 1911

WHOLESALE GROWERS      PEONIES EXCLUSIVELY  
BERLIN, - MARYLAND

# Please Read Before Ordering

**ALL QUOTATIONS** subject to stock being unsold upon receipt of order.  
Prices are fob Berlin, Maryland.

**SMALL ORDERS:** Our prices are very low and at such prices we cannot fill orders for less than twenty-five of one variety of the lower priced sorts, or five of one variety of the higher priced sorts, except as otherwise quoted.

**SIZE OF ROOTS:** Our prices are based on liberal, three to five eye divisions, cut from two to three year roots and which should not be confused with divisions cut from old commercial cut-flower clumps that may have lost much of their vitality.

The three to five eye divisions, through years of thorough testing, have proven to be the most satisfactory and economical size to buy and we recommend them to our customers.

Whole clumps quoted on application.

**SHIPPING INSTRUCTIONS:** When ordering, please give full shipping address when different from postoffice, and state whether you desire shipment via parcels post, express or freight.

**PARCELS POST CHARGES:** Orders of from one to ten roots, can generally be shipped cheaper by parcels post. Larger orders should go by express or freight. Owing to the multiplicity of Parcels Post rates to the various Parcels Post zones, we request "all cash-in-advance" customers who desire shipment to be made by Parcels Post, to remit fifteen cents extra for the first root and five cents extra for each additional root. With this arrangement, we anticipate that our losses and gains on postage will be about equal.

**WHEN WE SHIP:** We begin shipping as soon after September first as conditions will permit. Our Peonies are packed in tight, paper-lined boxes with old, damp sawdust and will carry to destination and keep in good condition for an indefinite period when stored in a cold, dry place.

**TERMS:** Cash with order, less three per cent from individuals or companies not satisfactorily rated. Otherwise, two per cent ten days, net thirty days. Special terms by agreement. All contracts and agreements are made subject to flood, drouth, fire, frost, crop failure or other causes beyond our control.

**NON-WARRANTY:** We exercise the greatest care to keep our plants true to name and are willing at any time to replace from our own stock, on proper proof, all stock that may prove otherwise, or refund the amount paid, but it is mutually agreed that we shall not at any time be liable for a greater amount than the original cost. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, planting, growth, life of stock or any other matter on any stock we sell.

**NO COMPLAINTS** will be considered that are not made within five days after receipt of stock.

**HARMEL PEONY COMPANY.**

# The Peony Supreme

The meteoric rise of the Peony in the esteem of the general public is without precedent, and it would seem that the time is not far distant when the Peony will displace the rose in its high bid for universal acclaim as our most loved flower.

Aside from the plantings in home gardens and as a part of the perennial border, many hundreds of acres of cut-flower varieties have been planted for the purpose of supplying cut-flowers for home and city trade. Farmers, as well as small truckers, discouraged because of the low prices obtained for ordinary farm crops, are diversifying by planting a part of their acreage to cut-flower varieties of Peonies, and they are finding the venture profitable far beyond their fondest hopes. Florists, because of the insistent demands of customers, are adding Peonies to their assortment of cut-flowers.

**"THE LIBERAL SIZE AND FINE QUALITY OF OUR WELL-BALANCED DIVISIONS, WILL PLEASE YOU."**

**TO THE WHOLESALE TRADE,** we offer, in quantity, a collection of worth-while varieties of Peonies which are grown under our personal supervision, on our own eighty acre farm, purchased and maintained solely for the production of fine Peonies on a large scale.

We grow Peonies Only and in our list, we offer "The World's Finest Varieties," including kinds which take the lead among high grade, low priced Peonies in characteristics necessary for producing profitable crops of commercial cut-flowers. We offer to you an opportunity to buy the best at reasonable prices. You will find many real bargains in our list. Other varieties of Peonies are growing in our nurseries and if they are found worthy, they will be offered to our trade as our stock increases.

All varieties are "trued" by experts and our blocks are "rouged" each year in order to locate any possible mixtures in handling.

We sell large orders each year to some of the heaviest buyers of Peonies and we feel that our Peonies will also please you.

# PEONIES ONLY

*The World's Finest Varieties*

GROWN BY

HARMEL PEONY COMPANY  
BERLIN, :- MARYLAND

PROFITABLE CUT-FLOWER and other commercial kinds which are especially popular and useful, and which can be offered at a low price, are "underscored" as FESTIVA MAXIMA. While all do not carry the highest ratings, many of them are cut-flower-market varieties which have withstood the acid test of commercial growing, where none but the most reliable and prolific bloomers are tolerated. Such varieties we endeavor to produce in quantity in order to fill the larger orders of 1,000, 5,000 and 10,000 or more.

## Plant Peonies for Cut-Flower Profits

About 3,600 to 5,000 plants required to set an acre. We often sell from \$1,000 to \$1,500 worth of cut-flowers in one season from an acre of Peonies. You should do as well. Plant an acre.

### Planting Suggestions

Peonies should be planted in the fall, at any time from September first until the ground freezes too deep to allow planting, and they succeed best in good quality, well drained garden soil, such as would produce a good crop of potatoes.

Place roots in their natural position, two to four feet apart (for permanent cut-flower planting, rows may be four feet apart, plants three feet apart in the row, or  $3\frac{1}{2}$  X  $3\frac{1}{2}$  feet will be preferred by some) with new eyes two inches below the surface of the ground. Many growers plant as close as 3 X 3 feet.

An application of raw ground bone (bone meal) thoroughly mixed with the soil will supply sufficient plant food for a year or two. A top dressing of hardwood ashes would assist in quick root development.

Soil should be well prepared by plowing or spading and cultivating to a depth of eight inches or more and allowed to settle for a few days prior to setting the roots.

On some types of soil (usually not necessary), a light covering of coarse well rotted stable manure or leaves or other mulch for the first winter will prevent the newly set roots from heaving out because of alternate freezing and thawing.

Remove covering from directly over the plants, in early spring, before Peonies come through the ground. When Peonies are up a few inches, cultivate thoroughly and often throughout the growing season.

### FOR THE TRADE NEWS

We recommend **The American Florist**, America's Oldest Floricultural Trade Paper. Published every Thursday. \$1.00 per year, \$2.00 for three years.

Mail your subscription to 60 West Washington Street, Chicago, Illinois.

### FOR ALL WHO GROW FLOWERS

We recommend **The Flower Grower**. Published monthly. "The Magazine With a Mission." Edited, published and owned by Madison Cooper.

A publication that is all that its name implies. But it is also much more.

Those who are interested in outdoor activities and who aspire to better living conditions; more beautiful surroundings; and a better outlook on life; will find many useful hints, suggestions, facts and information.

Subscription price: \$2.00 per year; 3 years, \$4.50; 5 years, \$6.00; one copy 20c.

Mail your subscription direct to: The Flower Grower, Calcium, N. Y.

**MEMORANDUM**

# Decoration Day Varieties

These varieties, in many localities, bloom sufficiently early for Decoration Day sales and are therefore considered very valuable for commercial cut-flower plantings where early blooming is important.

**ALEXANDRE DUMAS 7.1 (Guerin 1862)** Light Violet-Rose  
Crown Type. One of the older varieties, still planted in quantity for cut-flowers. Blooms are of medium size, with guards and center of bright violet-rose and narrow chamois-colored petals mingled with the center and forming the collar. The plant is of spreading habit and is an exceptionally free and reliable bloomer. **EARLY.**

**DUCHESSE DE NEMOURS 8.1 (Calot 1856)** Yellow-White  
Crown Type. Opens with center tinted a beautiful sulphur-yellow which later fades to white. Pleasant odor. Vigorous, upright grower and one of the very best bloomers. Blooming as it does, about two days later than Festiva Maxima, makes it a very valuable kind to use in combination with Festiva Maxima. This is one of the very best commercial cut-flower Peonies and no grower can afford to leave it out of his planting. We recommend a good portion of any commercial planting to be of Duchesse de Nemours. **EARLY.**

**EDULIS SUPERBA 7.6 (Lemoine 1824)** Deep Pink  
Crown Type. Strong, hardy grower; prolific bloomer; very fragrant. Bright rose pink and generally known in the cut-flower market as "Decoration Day pink." A good keeper and ships well. Over one hundred years old but still leading in the field of reliable early deep pinks. **EARLY.**

**FESTIVA MAXIMA 9.3 (Millez 1851)** White  
Rose Type. Pure white with prominent crimson markings; fragrant. Very sturdy, tall, strong stems; blooming habit very dependable and succeeds wherever Peonies will grow. Thought by many to be the finest white in existence and surely the most popular of all cut-flower Peonies. Hundreds of acres of this variety have been planted for producing commercial cut-flowers for the home and city markets. For seventy six years Festiva Maxima has maintained its leadership. **EARLY.**

**FLORAL TREASURE 7.5 (Rosefield 1900)** Salmon Pink  
Rose Type. Delicate salmon-pink. Center petals are loose and spread just enough to show the carpels of light greenish-yellow, tipped white, giving a fresh, dainty color effect. Flowers are fragrant and on well established plants are very large and perfectly formed. Strong, tall grower. Desirable for landscape and commercial cut-flowers. **EARLY MIDSEASON.**

**MME. DE VERNEVILLE 7.9 (Crousse 1885)** White  
Bomb Type. Pure white with petals carmine tipped. It has the true June Rose fragrance and is one of the most charming of all varieties. This is an old established and fully tested Peony and for dependability for cut-flowers and general planting, is unusually valuable. **EARLY.**

**UMBELLATA ROSEA 7.4 (Guerin 1895)** Light Pink  
Rose Type. Shell pink with center petals a creamy white. Strong upright grower and profuse bloomer. Comes in bloom earlier than any other Peony of the "so called" Chinensis class which makes it extremely valuable for cutting in time for Decoration Day market. A profitable variety. **VERY EARLY.**

## MOST POPULAR CUT-FLOWER RED

**FELIX CROUSSE 8.4 (Crousse 1881)** Red  
Bomb Type. Vigorous grower; spreading habit; blooms freely. Bright red; pleasant odor. The most popular and satisfactory of all red Peonies for cut-flower purposes, which can be purchased at a low price. Good for general planting and landscape work. We recommend Felix Crousse without reservation. **MID-SEASON.**

**NOTE:** Most of the above varieties, can be furnished in lots of 1,000, 5,000, and 10,000. For prices, see "General List," in this price list.

**FRANDAMA GARDENS**  
PEONIES AND IRISES  
HOLLAND BULBS

425 Ashbourne Road (rear), Elkins Park, Pa.

May 31, 1927.

Mr. A. H. Hardesty,  
Harmel Peony Company,  
Berlin, Md.

Dear Mr. Hardesty:—

The return trip has been made safely and without incident. It was five very pleasant days that I have passed with you. I can not refrain from going on to add that I was delighted with everything that I found in Berlin and at your peony farm. You have a fine big stock in excellent condition, and it is being cared for well, too. In fact, in all my experience I have not found a big lot of peonies that has been managed better. And my experience with this flower dates back quite a way, fifteen years indeed. I have been associated, as you know, with some of the most eminent and successful growers in the country. I want to commend the painstaking accuracy you exercise in having everything just right. And it is delightful to know that you have progress ahead of you, for along with the splendid stock of the good standard varieties you have the beginnings of many of the most prominent new ones the increase of which your patrons can look forward to.

I am very grateful for the kind entertainment given me.

Yours cordially,

Frank B. Meyer.
